

## UNUSED NIAGARAS.

Close to a foaming cataract  
A busy city lay.  
Nor knew the brightness that it lacked  
Was hidden in the spray.

A wise philosopher one day  
Questioned the Fall aright,  
And learned to change in some strange  
way  
Its motion into light.

And now, the city shines so  
The midnight shadows flee  
And still Niagara doth flow  
Unaltered to the sea.

Thus have we often let the power  
For helping other go  
Unused Niagara that roar  
For darkened Buffalo.

Oh, why not life the wire of Faith  
Ere all the waves depart?  
And let the power that Heaven hath  
Illuminate the heart.

It can illuminate the heart  
With light supreme and pure,  
This day, by soul, oh, let us start,  
And make connection sure.  
—Julia Harris May.

## THE LITTLE MOUNTAIN MAID

By DOROTHY G. CLARK

Copyrighted, 1902, by The Authors Publishing Company

They were seated on a rustic bench at a fashionable water place. She was a fair woman of 26; he a tall, dark, handsome man of 30.

"I want to tell you the story of my life, Miss Arlington," he was saying. "I don't suppose it will prove interesting to you, but I have a selfish desire for your opinion after I have finished. I will not tire you with details, but will state as briefly as possible the principal facts. I shall picture to you a dirty, ill-clad, ill-fed boy, who knew nothing of schools nor books, at the age of thirteen. My mother died when I was quite small, and I stayed with my father, whose business was working one of those numerous stills in the mountains of Tennessee, and dodging the revenue officers, when he was not too drunk to do so. My duty was to scout around and warn him if danger threatened; and for my faithfulness I received but kicks and threats. At last he was killed while defending the still, and I was left alone—A family took me to work for my board, but the treatment I received at their hands was more than I could stand, so one night I went away. All night I ran through the darkness; every noise increased my terror lest I should be overtaken and carried back. After sunrise I crept into a thick clump of pines some distance from the road, and with my bundle for a pillow I fell asleep. Several hours later I was awakened by a little girl bending over me.

"Where'd youns kim from?" she asked calmly, as I opened my eyes. I bounded to my feet, expecting that I was about to be captured and taken back, but there was no one else in sight. "What youns 'frail of, boy?" she asked.

After she had repeatedly assured me that she had not seen anyone after me, and she knew her pa and ma would not let me go if anyone came for me, and I had cautiously peered behind nearly every tree in the vicinity, I told her my story. I at once enlisted her sympathy, which was sweet to me, as it was the first I had ever known.

"When my story was finished, she came close to me, and, patting my

looking for me, pointed the nearest way to town, and as we parted, said: 'I reckon youns'll hev ter kim back an' marry me w'en youns gits rich,' and I promised her, of course.

"Miss Arlington, that was my first and last experience in childish companionship, and my first taste of the sweetness of human kindness and sympathy."

"I reckon youns'll hev ter kim back an' marry me w'en youns gits rich," patting my head, she said. "I have never since seen my little mountain girl; but can you wonder that she still has a warm place in my memory?"

Miss Arlington was looking intently at the ground, and made no reply. "In two months' time," he continued, "I had worked my way to the far west. A few weeks later I found an old man lying in one of the mountain gorges, crushed and bruised. I assisted him to his cabin, procured medical assistance, and nursed him back to health. He was a reclusive, and was known as a bad map, but my act completely changed his nature. I had been good to him without any selfish motive, and he felt toward me, as I did toward the little girl back in Tennessee.

"As soon as he was well he adopted me and changed my name, and then my education began. Being an educated man, the hermit had charge of my studies until I was fitted for college. He molded me according to his own conception of manhood, ever impressing upon me the sin of ingratitude. As boy and man I had talked and thought about the little mountain lass. You have no idea how tender a romance could be built upon a foundation as slender.

"Before I entered college my benefactor told me that I was to be a gentleman; that I had unlimited wealth at my command, and that I must spend money freely for the benefit of others. He had a fortune left him, which had increased rapidly during the years of his seclusion.

"I suggested that I go back to my old place and see if I could do anything for the little girl who had been so kind to me. No act of mine ever pleased him more. I traveled to Tennessee and found that her parents had died some years before, and that she had been adopted by a widow, who had moved to a distant part of the country; but I found no trace that I could follow. I advertised, but to no avail. She has been in my dreams all these years, and I determined never to give up the search until I knew what had become of her. Now for your advice. Should I marry before I have found this girl?"

"You certainly should not," she replied, raising her eyes for the first time.

"I had hoped for a different answer."

"I can give you no other."

"But she may be married, or dead," he urged.

"You are not sure."

"And perhaps she is an illiterate as the people from which I sprang, and whom I detest for their ignorance and lack of ambition."

"And if she were?"

"I could never marry her. Every man has his ideal. Mine has been the little mountain maid; now, you are my idea of perfect womanhood. Could you not grant my heart's desire by marrying me?"

"Are you sure you would care for me, even if you knew my past?" she asked timidly, after a pause.

"I am sure no other woman will ever hold the place in my heart that you hold. I care nothing for the past if I can have you in the future."

"Shall I tell you of my childhood?"

"If you wish, but it will take no time." After a long pause he said, "Please do not keep me in suspense."

"You were born in the mountains of Tennessee," she began, "and I, too, was born in the mountains of Tennessee. My parents died when I was a child, and I was adopted by a wealthy lady, a cousin of my mother's, and—"

"Well?"

"I—I remember the little boy whom I found asleep beneath the pines—"

Her listener started. "You! Miss Arlington!" he exclaimed, lifting her head so that he could look into her eyes. "Are you my little mountain maid?"

"Yes," very faintly.

"My darling!"

"I—I remember the little boy whom I found asleep beneath the pines—"

Her listener started. "You! Miss Arlington!" he exclaimed, lifting her head so that he could look into her eyes. "Are you my little mountain maid?"

"Yes," very faintly.

"My darling!"

"I—I remember the little boy whom I found asleep beneath the pines—"

Her listener started. "You! Miss Arlington!" he exclaimed, lifting her head so that he could look into her eyes. "Are you my little mountain maid?"

"Yes," very faintly.

"My darling!"

"I—I remember the little boy whom I found asleep beneath the pines—"

Her listener started. "You! Miss Arlington!" he exclaimed, lifting her head so that he could look into her eyes. "Are you my little mountain maid?"

"Yes," very faintly.

"My darling!"

"I—I remember the little boy whom I found asleep beneath the pines—"

Her listener started. "You! Miss Arlington!" he exclaimed, lifting her head so that he could look into her eyes. "Are you my little mountain maid?"

"Yes," very faintly.

"My darling!"

"I—I remember the little boy whom I found asleep beneath the pines—"

"Yes," very faintly.

"My darling!"

"I—I remember the little boy whom I found asleep beneath the pines—"

Her listener started. "You! Miss Arlington!" he exclaimed, lifting her head so that he could look into her eyes. "Are you my little mountain maid?"

"Yes," very faintly.

"My darling!"

## VALUE OF CHANGE.

Revival of Old Adage: "Change of Pasture Makes Fat Calves."

A truth very generally recognized by Colorado pioneers is expressed in more learned form by the Medical Review. It says:

"The quasi-miraculous benefits which are associated with change of air in the popular belief are in reality derived when they accrue from change of environment and change of habits of life. In a great many instances the measure of benefit obtainable would be as effectually secured, and at much less expense, by mere change of habits, without the fatigue and inconvenience of a change of domicile. The overworked city clerk might advantageously take to driving a cab, while the cabman would find it a relief to discharge for a time the functions of a caretaker of a deserted house. Many an overworked physician would experience a distinct improvement were he to qualify as a chauffeur, with no other object in view than to cover space, and there are few domestic servants whose health would not be sensibly modified by a brief experience as a milkmaid or gleaner, should the season lead itself to that pursuit. The 'literary gent' whose brain is sterile of new ideas might recuperate his energies by usurping the role of a sick man and remaining in bed for a week or two."

The change of habit involved in the long journey across the plains, by the ox-team method, together with enforced exposure to air and sunshine, was responsible for many of the cures of weak lungs that are credited up to the Colorado climate. The climate is good, but the change of habit is also good. "Change is rest" loses nothing in the testing.—Denver News.

## \$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials.

Sold by druggists, etc.

Hall's Family Pills are the best.

Mount Assiniboine, long called "the Matterhorn of the Rockies," lies twenty miles from Banff, and towers, a mighty monolith, 1,500 feet above its neighbors. Attempts to scale the peak have proved futile, till James Outram, in company with four guides, was successful. The details of this mountain-climbing feat, "perhaps the most sensational yet achieved in North America" will be told in the September Century. Reproductions of a number of photographs will add to the vividness of the narrative.

Life is for most people a continuous process of getting used to things they haven't been expecting.

## First Come, First Served.

We would rather sell our fine San Luis valley lands to Colorado farmers. Best water rights, fertile soil, low prices, easy terms. If easterners come first—and they're coming fast—we will sell to them, of course. Send for our new booklet and see what you're missing. The Colorado Bureau of Immigration, 616 Majestic Bldg., Denver, Colo.

Wireless telegraphy and wireless telephones are easy, but it will take a rare genius to perfect wireless politics.

## Sensible Housekeepers

will have Defiance Starch, not alone because they get one-third more for the same money, but also because of superior quality.

When a nobleman pays his attentions to a Yankee millionaire's daughter, he usually hopes to have her pay his debts.

## \$1.00 BIG 500-POUND STEEL RANGE OFFER.

If you can use the best big 500-pound steel range made in the world, and are willing to have it placed in your own home on three months' free trial, just cut this notice out and send to S. H. HARRIS & CO., Chicago, and you will receive free by return mail a big picture of the steel range and many other cooking and heating stoves you will also receive the most wonderful \$1.00 steel range offer, an offer that places the best steel range or heating stove in the home of any family, such an offer that no family in the land, no matter what their circumstances may be, or how small their income, need be without the best cooking or heating stove made.

"Confine yourself to water and you'll never get tight." "I don't know about that; I've seen a boat that was water-tight."

FITS Permanently Cured. Sufferers can now, after first try a box of Dr. Kline's Great Kidney and Bladder Remedy, get FREE \$4.00 trial bottle and treatise. Dr. R. H. KLINE, 143, 31 Arch St., Philadelphia, Pa.

"She told me," said the young man who had consulted a fortune-teller, "that I was born to command." "Well, well," exclaimed Henpeck; "she means then that you will never be married."

Mrs. Winslow's Scenting Syrup. For children's teething, soothes the gums, reduces inflammation, always cures, cures wind colic, 25c a bottle.

"Why did you curtail the cur's tail?" "Because I wanted to take him in the carriage and his tail would keep a waggin'."

FALL TERM OF CENTRAL BUSINESS COLLEGE OF DENVER opens Sept. 1st. Courses: Bookkeeping, Shorthand and Telegraphy.

Dolly—What place does Mrs. Rusher hold in the 66? Kitty—Oh, she's one of the noughts.

A smile of satisfaction comes with one of Baxter's "Bullhead" 5-cent cigars.

Some men are like a razor, sharper when they are strapped.

Dealers say that as soon as a customer tries Defiance Starch it is impossible to sell them any other cold water starch. It can be used cold or boiled.

Nothing brings the wolf to the door quicker than bucking the tiger.

POTNAM FADELESS EYES are fast to light and washing.

Here's still a good motto: Not learned in a school—Take time by the forelock, And also the mule!

The mildest tobacco that grows is used in the make-up of Baxter's Bullhead 5-cent cigar. Try one and see.

If there is no other way to kill off the English sparrows it might be possible to get the Legislature to pass a law protecting them.

Don't you know that Defiance Starch besides being absolutely superior to any other, is put up 16 ounces in package and sells at same price as 12-ounce packages of other kinds?

"Wyndham boasts that what he doesn't know, about his business, wouldn't fill a book." "Well, I notice that what he does know hasn't filled his pocketbook."

If you have smoked a Bullhead 5-cent cigar you know how good they are; if you have not, better try one.

"You don't mean to say that you have no theories about the education of children?" "No, have too many children."

**THE COMFORT CORRECTIVE FOR TYPHOID CONTAGION.**

**Typoid Fever Can Be Prevented.**

Our corrective does it. Money returned in case of failure. A full month's treatment for \$1.00. Write for free booklet. Address: Comfort Mfg. Co., 1014 and Curtis Sts., Denver, Colo., Department C.
